Three Rivers Campus

Our Three Rivers Campus was built in the 1830's in the gorgeous town of Belchertown . Our new 5100 square foot facility sits on over 4 1/2 acres with many features.

Three Rivers is a Clinically Intensive Residential Treatment Program (CIRT) in Massachusetts serving children 6-12 years old as well as their families. Our multi-dimensional modalities of treatment are deeply rooted in supporting the ability to experience and learn the fundamental skills that develop in relationships with others, including safety, belonging, self-regulation and respect.

During the time that a child resides at the program we work to help them and their family to grow in the ability to enjoy positive and helpful relationships, manage stress and challenging feelings, participate in school and daily routines, and to recognize and champion their own values and strengths.

Local Colleges
